Oregon® Adds To Online Chainsaw Fit-up Application

Oregon Cutting Systems has recently added 216 chainsaw models to its Oregon® Selector Guide on www.oregonchain.com. Forty chainsaw manufacturers and more than 2,000 chainsaw models are represented in this easy-to-use, web-based application by the Oregon Cutting Systems Group (OCSG).

“The Oregon® Selector Guide is a valuable web reference for our distributors, dealers and end-users,” says Brian Maher, US Zone Manager for Oregon Cutting Systems. “Around the clock, chainsaw fit-up requests are placed every two minutes via the Oregon® Chainsaw Selector Guide. Of course, end users also use this online fit-up application to find the correct Oregon® saw chain, bar and sprocket for their chainsaw.”

The Oregon® Selector Guide also features a “shopping list” feature that allows users to select only the chainsaw cutting attachments they need, and then print the shopping list and take to a dealers’ shop for purchase, or shop online at an OCSG authorized Key Dealer Online Store.

Oregon Cutting Systems Group: Founded in 1947, the Oregon Cutting Systems Group of Blount, Inc. is a world leader in providing high quality, original equipment and replacement parts to the outdoor power equipment industry. Replacement products sold under the Oregon® brand name provide the industry with one of its most complete lines of parts including: saw chain, guide bars, sprockets and maintenance accessories for chainsaws; lawnmower blades, engine parts, belts, tires and service tools for mowers and other outdoor power equipment; and trimmer line, heads, and blades for trimmers and brushcutters. Oregon® replacement products are sold in more than 130 countries, and many leading manufacturers of outdoor power tools use parts made by Oregon Cutting Systems as original equipment. More information about the Oregon Cutting Systems Group and the Oregon® brand of quality replacement parts can be found at www.oregonchain.com.
